

Sustainable mobility

#EUagenda2024

- Support infrastructure for **alternative sustainable fuels**
- Half the **CO₂-emissions from global shipping** by 2050
- An **aviation tax in Europe** and an ambitious CO₂ offset system globally

The big picture objectives

#EUagenda2024

- 2019**: A sustainability Vice President to steer the transition
- 2030**: A higher CO₂-reduction target
- 2050**: Net-zero emissions: necessary and possible

Carbon free energy

#EUagenda2024

- A **carbon floor price** for the electricity sector in the ETS
- Kickstart the **clean hydrogen market**
- A secure **climate-neutral energy supply**

ETS price

Circular agriculture

#EUagenda2024

- An **obligation to offer ecoschemes** and spend fixed percentage of the CAP to fight climate change
- Reduce food waste** and change overly strict rules for re-use of leftovers
- Allow **recovered nutrients from manure** to be used in fertilizers

A climate-proof European Union

Climate change is one of the largest global challenges we face. To live up to what we agreed in Paris, the EU must be climate neutral by 2050.

Concrete policy measures must support these targets. All sectors have a role to play: from **industry, energy and transport** to **finance and agriculture**. Policies must boost **competitiveness** and help transition to a **circular economy**. Fighting climate change should be the cornerstone of our **foreign policy**.

Ambitious climate targets bring opportunities for innovation, new jobs, and economic growth.

#EUagenda2024

Foreign relations

#EUagenda2024

- EU programmes support **low-carbon development** and climate resilience
- The **EU takes the lead** internationally
- EU trade agreements refer to the **Paris Agreement**

Sustainable finance

#EUagenda2024

- Spend **25% of the MFF** on climate; make the other 75% Paris-proof
- Account for **carbon footprint of EU spending** to monitor effective contribution to climate goals
- End EU investment in fossil fuels** through the EIB and others

Low carbon competitiveness

#EUagenda2024

- A European **carbon floor price** to give green investment a level playing field
- Stimulate **green technologies** and climate-friendly business operations
- Include **carbon capture, utilization, and storage** in the emissions trading scheme

ETS price

Circular economy

#EUagenda2024

- Improve **consumer information and environmental labels**
- Enable increased use of **secondary raw materials** so less fossil resources are needed
- Trace materials and chemicals** throughout the supply chain for easier recycling
